

2026 Week 6 Waiver Wire

Revision 1 | 2026-10-13T16:30:09Z

12-team redraft, half-PPR, one starting quarterback. Bids use the original season FAAB budget. Game points equal official standard points plus 0.5 per reception; they are historical results, not projections. Missing weekly rows are not labeled zero. Kicker and defense scoring depends on league rules.

Cincinnati, Detroit, Miami and Minnesota are idle in Week 6. Fill a real starting gap before paying for bench depth. Statistics include all 79 completed games through Week 5. Candidate order and FAAB bands are original MFT judgments.

FAAB ranges use your original season budget: 10% is \$10 from an original \$100 budget. Cap bids at your remaining balance and follow league minimums and increments.

Deep leagues and stashes

Brian Robinson is a low-cost bench contingency rather than a promised starting role. Reserve-list candidates Zach Charbonnet and Dylan Sampson are excluded from immediate lineup adds. Missing weekly statistics remain unavailable, not zero.

Superflex adjustment

Prioritize available starting quarterbacks more highly when two can start. These one-QB bids are not superflex valuations; compare the expected lineup improvement with your remaining budget.

Claim strategy

Submit ordered alternatives for the same drop slot. Scale the high end of a bid to an actual starting need; a bench stash belongs near the low end. Preserve budget for later weeks. Check deadline, minimum bid and tie-breaking rules. Recheck all injury-dependent claims before waivers process.

What changed
