2026 Week 9 Waiver Wire

Revision 1 | 2026-11-03T18:23:15Z

12-team redraft, half-PPR, one starting quarterback. Bids use the original season FAAB budget. Game points equal official standard points plus 0.5 per reception; they are historical results, not projections. Missing weekly rows are not labeled zero. Kicker and defense scoring depends on league rules.

Pittsburgh and Tennessee are on bye. Fill a starting need before bidding for a stash. Production includes all 121 completed games through Week 8; FAAB bands and candidate priorities are original MFT judgments.

FAAB ranges use your original season budget: 10% is $10 from an original $100 budget. Cap bids at your remaining balance and follow league minimums and increments.

Check these players first

Jonah Coleman / Mike Washington / Tyler Allgeier / Dylan Sampson / Keenan Allen

Running backs

1. Jonah Coleman | DEN

Reviewed add | Suggested FAAB: 15-25%

Recent rushing and receiving production supports an immediate addition. Budget for repeatable opportunities, while checking whether the backfield distribution holds in the next game. Recorded half-PPR points: W1 0.00, W2 13.30, W7 7.90, W8 18.40. W8: 11 carries, 5 targets and 4 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Injury condition: November 3 CBS lists RJ Harvey (Knee; Injured reserve). Recheck current participation and final status; the cited label is not a Week 9 ruling.

Report-week opponent: at CAR

ESPN via NFL.com (captured Nov 3): 52% rostered; checked on 2026-11-03. Check your league.

2. Mike Washington | LV

Reviewed add | Suggested FAAB: 12-22%

The latest carry volume warrants a serious addition, but one workload is not a permanent allocation. San Francisco creates a different test for rushing efficiency. Recorded half-PPR points: W1 4.10, W2 0.70, W3 11.40, W4 2.20, W5 1.50, W6 5.50, W7 2.70, W8 8.30. W8: 25 carries, 0 targets and 0 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: at SF

ESPN via NFL.com (captured Nov 3): 18% rostered; checked on 2026-11-03. Check your league.

3. Tyler Allgeier | ARI

Reviewed add | Suggested FAAB: 8-16%

A productive recent game makes him useful depth. Any starting projection depends on the availability of competing backs; avoid bidding as though an injury-dependent role is already permanent. Recorded half-PPR points: W1 8.00, W2 2.90, W3 2.90, W4 11.90, W5 2.60, W6 5.30, W7 6.40, W8 33.60. W8: 11 carries, 5 targets and 5 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Injury condition: November 3 CBS lists Jeremiyah Love (Ankle; Questionable); Zonovan Knight (Concussion; Questionable). Recheck current participation and final status; the cited label is not a Week 9 ruling.

Report-week opponent: at SEA

ESPN via NFL.com (captured Nov 3): 46% rostered; checked on 2026-11-03. Check your league.

4. Dylan Sampson | CLE

Reviewed add | Suggested FAAB: 5-10%

Recorded catches and targets provide multiple routes to useful half-PPR production. A shared backfield still limits certainty about carries and scoring chances. Recorded half-PPR points: W1 0.00, W7 9.20, W8 9.90. W8: 1 carries, 8 targets and 6 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: at NO

ESPN via NFL.com (captured Nov 3): 12% rostered; checked on 2026-11-03. Check your league.

Wide receivers

1. Keenan Allen | IND

Reviewed add | Suggested FAAB: 4-8%

Receiving involvement offers a practical depth option. Evaluate repeated targets and actual lineup needs before assuming future roster moves will increase his opportunity. Recorded half-PPR points: W1 6.20, W2 1.00, W3 15.30, W5 7.00, W6 12.20, W7 4.60, W8 10.20. W8: 0 carries, 7 targets and 7 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: vs. DAL

ESPN via NFL.com (captured Nov 3): 42% rostered; checked on 2026-11-03. Check your league.

2. Adonai Mitchell | NYJ

Reviewed add | Suggested FAAB: 4-9%

The current production merits attention, while a crowded receiving group makes the next target total uncertain. A bench addition is easier to justify than projecting the last score every week. Recorded half-PPR points: W1 7.50, W2 9.30, W7 0.00, W8 23.70. W8: 0 carries, 9 targets and 7 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: at KC

ESPN via NFL.com (captured Nov 3): 11% rostered; checked on 2026-11-03. Check your league.

3. Caleb Douglas | MIA

Reviewed add | Suggested FAAB: 3-7%

Recent receiving work offers an upside option for deeper lineups. Separate potential big plays from a stable reception floor, and keep the bid appropriate to that uncertainty. Recorded half-PPR points: W1 11.90, W2 2.90, W7 20.00, W8 6.30. W8: 0 carries, 6 targets and 4 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: vs. DET

ESPN via NFL.com (captured Nov 3): 29% rostered; checked on 2026-11-03. Check your league.

Quarterbacks

1. Malik Willis | MIA

Reviewed add | Suggested FAAB: 1-4%

A quarterback stream for a specific lineup need. The statistical sample and upcoming opponent should inform expectations; keep flexibility if a stronger option is available. Recorded half-PPR points: W1 16.70, W2 12.48, W3 10.00, W4 2.50, W5 18.88, W7 26.02, W8 14.64.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: vs. DET

ESPN via NFL.com (captured Nov 3): 11% rostered; checked on 2026-11-03. Check your league.

2. J.J. McCarthy | NYG

Reviewed add | Suggested FAAB: 1-4%

A post-bye quarterback option for deeper or replacement lineups. Use confirmed participation and current team context before projecting the earlier passing sample forward. Recorded half-PPR points: W5 0.20, W6 16.32, W7 10.18.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: at PHI

ESPN via NFL.com (captured Nov 3): 15% rostered; checked on 2026-11-03. Check your league.

Tight ends

1. Chigoziem Okonkwo | WAS

Reviewed add | Suggested FAAB: 3-7%

The recent receiving sample gives a basis for evaluating a tight-end fill-in. Opportunity must translate into repeated catches before a larger role can be treated as reliable. Recorded half-PPR points: W1 2.60, W4 1.50, W5 8.00, W6 10.40, W8 2.20. W8: 0 carries, 4 targets and 2 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Injury condition: November 3 CBS lists Terry McLaurin (Knee; Injured reserve). Recheck current participation and final status; the cited label is not a Week 9 ruling.

Report-week opponent: vs. LA

ESPN via NFL.com (captured Nov 3): 16% rostered; checked on 2026-11-03. Check your league.

2. Brenton Strange | JAX

Reviewed add | Suggested FAAB: 4-8%

Recorded receiving production supports a tight-end depth addition. The position is thin, but the bid should still reflect the difference between regular involvement and predictable touchdowns. Recorded half-PPR points: W1 9.30, W2 2.70, W3 4.70, W4 13.00, W5 10.30, W6 6.90, W8 6.50. W8: 0 carries, 2 targets and 2 catches.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: at BAL

ESPN via NFL.com (captured Nov 3): 50% rostered; checked on 2026-11-03. Check your league.

Kickers

1. Tyler Bass | BUF

Kicker stream | Suggested FAAB: 0-2%

A low-cost kicking option tied to Buffalo possessions. Field-goal opportunities depend on how drives end, so avoid paying for a precise point forecast.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: at MIN

FantasyPros; platform unspecified (Nov 2): 41% rostered; checked on 2026-11-03. Check your league.

2. Wil Lutz | DEN

Kicker stream | Suggested FAAB: 0-2%

An inexpensive one-week kicking option. Evaluate weather and the final lineup, and retain flexibility because touchdown efficiency can reduce field-goal attempts.

Main risk: Target share, game script and availability can change. Check your actual league and remaining budget. Historical production is not a forecast.

Report-week opponent: at CAR

FantasyPros; platform unspecified (Nov 2): 15% rostered; checked on 2026-11-03. Check your league.

Team defenses

1. New Orleans Saints | NO

Defense stream | Suggested FAAB: 0-2%

An original low-cost stream against CLE. Matchup and recent pressure are more useful than chasing defensive touchdowns; scoring depends on league rules.

Main risk: Turnovers and defensive touchdowns are volatile. A favorable opponent does not guarantee points.

Report-week opponent: vs. CLE

ESPN via NFL.com (captured Nov 3): 2% rostered; checked on 2026-11-03. Check your league.

Deep leagues and stashes

Availability observations are dated and league-specific. Injury-dependent backfield roles need a fresh check before kickoff; trade rumors are not completed transactions. Missing statistics and availability remain unknown.

Superflex adjustment

Prioritize available starting quarterbacks more highly when two can start. These one-QB bids are not superflex valuations; compare the expected lineup improvement with your remaining budget.

Claim strategy

Submit ordered alternatives for the same drop slot. Scale the high end of a bid to an actual starting need; a bench stash belongs near the low end. Preserve budget for later weeks. Check deadline, minimum bid and tie-breaking rules. Recheck all injury-dependent claims before waivers process.

What changed

Fresh November 3 official roster/statistics and CBS injury snapshot. November 2 NFL.com ESPN observations and FantasyPros kicker observations captured November 3; no prior edition is rewritten.
