2026 Week 11 Waiver Wire

Revision 1 | 2026-11-17T16:34:39Z

12-team redraft, half-PPR, one starting quarterback. Bids use the original season FAAB budget. Game points equal official standard points plus 0.5 per reception; they are historical results, not projections. Missing weekly rows are not labeled zero. Kicker and defense scoring depends on league rules.

Atlanta, Cleveland, Green Bay, New England, Seattle and the Rams are on bye. Konata Mumpfield is a stash for after the bye. Fill a starting need before bidding for a stash. Production includes all 150 completed games through Week 10; FAAB bands and candidate priorities are original MFT judgments.

FAAB ranges use your original season budget: 10% is $10 from an original $100 budget. Cap bids at your remaining balance and follow league minimums and increments.

Deep leagues and stashes

Availability observations are dated and league-specific. Injury-dependent backfield roles need a fresh check before kickoff; trade rumors are not completed transactions. Missing statistics and availability remain unknown.

Superflex adjustment

Prioritize available starting quarterbacks more highly when two can start. These one-QB bids are not superflex valuations; compare the expected lineup improvement with your remaining budget.

Claim strategy

Submit ordered alternatives for the same drop slot. Scale the high end of a bid to an actual starting need; a bench stash belongs near the low end. Preserve budget for later weeks. Check deadline, minimum bid and tie-breaking rules. Recheck all injury-dependent claims before waivers process.
